Molecular biology / m  ™  ^ |  > k j  Š |  ™r / is a branch of biology that concerns the molecular basis of biological activity between biomolecules in the various systems of a cell, including the interactions between DNA, RNA, proteins and their biosynthesis, as well as the regulation of these interactions. Writing in Nature in 1961, William Astbury described molecular biology as:

Comparative Biochemistry & Physiology (CBP) publishes papers in comparative, environmental and evolutionary physiology.. Part A: Molecular and Integrative Physiology, focuses on physiological systems, including behavior, circulation, development, excretion, ion regulation, endocrinology, locomotory, nervous, nutrition, respiration, and thermal biology.

In biochemistry and pharmacology, a ligand is a substance that forms a complex with a biomolecule to serve a biological purpose. In protein-ligand binding, the ligand is usually a molecule which produces a signal by binding to a site on a target protein. The binding typically results in a change of conformational isomerism (conformation) of the target protein.

Keystone Symposia, a non-profit organization dedicated to connecting the scientific community for the benefit

of the world community and accelerating life science discovery, conducts scientific conferences on biomedical and life science topics in relaxing environments that catalyze information exchange and networking. Meetings are designed to encourage scientists to discuss the newest ideas ...

Electrical impulses travel from neuron to neuron to transfer information. When an electrical impulse reaches the end of a neuron, it triggers the opening of channels that release calcium ions. The increase in calcium triggers the release of neurotransmitter molecules into the synapse. The ...

Lipid decomposition studies in frozen fish have led to the development of a simple and rapid method for the extraction and purification of lipids from biological materials. The entire procedure can be carried out in approximately 10 minutes; it is efficient, reproducible, and free from deleterious manipulations. The wet tissue is homogenized with a mixture of chloroform and methanol in such ...
