

### **computational acoustics in architecture pdf**

Acoustics is the branch of physics that deals with the study of all mechanical waves in gases, liquids, and solids including topics such as vibration, sound, ultrasound and infrasound. A scientist who works in the field of acoustics is an acoustician while someone working in the field of acoustics technology may be called an acoustical engineer. The application of acoustics is present in almost ...

where  $N$  is the number of scattered sensor nodes in region  $A$ ; and  $R$ , the radio transmission range. Basically,  $\hat{1/4}(R)$  gives the number of nodes within the transmission radius of each node in region  $A$ . In addition, the number of nodes in a region can be used to indicate the node density. The node density depends on the application in which the sensor nodes are deployed.
