A cement is a binder, a substance used for construction that sets, hardens, and adheres to other materials to bind them together. Cement is seldom used on its own, but rather to bind sand and gravel together. Cement mixed with fine aggregate produces mortar for masonry, or with sand and gravel, produces concrete. Cement is the most widely used material in existence and is only behind water as ...

The social picture is less engaging. Alternatively lauded or execrated, concrete is also the most controversial among all building materials. In spite-, and perhaps because-, of its emblematic role in the development of the modern world, it is crystallizing our expectations, our disappointments and sometimes our hates.
