Why use feedback control or better, why do you need a control system at all? consider ovens, A/C units, airplanes, manufacturing, pumping stations, etc What are we controlling? some physical quantity (constant) a dynamic behavior (a function of time) We need to 'tell' the system how we want it to behave

Types of Control: Open loop, feedback, feedforward

Closed-loop control systems are more commonly called feedback control systems, and are considered in more detail beginning in the next section. To classify a control system as open-loop or closed-loop, we must distinguish clearly the components of the system from components that interact with but are not part of the system. For example, the
