Navision & Dynamics NAV User Guide: Volume 1: Advanced

Accounting or accountancy is the measurement, processing, and communication of financial information about economic entities such as businesses and corporations. The modern field was established by the Italian mathematician Luca Pacioli in 1494. Accounting, which has been called the "language of business", measures the results of an organization's economic activities and conveys this ...

Algorithmic trading is a method of executing a large order (too large to fill all at once) using automated pre-programmed trading instructions accounting for variables such as time, price, and volume to send small slices of the order (child orders) out to the market over time. They were developed so that traders do not need to constantly watch a stock and repeatedly send those slices out manually.

An examination of accounting for repurchase agreements

The Journal of Financial Economics began a new section containing applied papers and case studies in 1989. This section provides a high-quality professional outlet for scholarly studies of actual cases, events or practice. Such phenomena provide a rich source of data that illustrate or challenge accepted theory and lead to new insights about the world.
