In fact, many minerals found in nature, such as zinc-blende (ZnS) cuprite (Cu<sub>2</sub>O) and galena (PbS), to name just a few, are semiconductors. Including the semiconductors synthesized in laboratories, the family of semiconductors forms one of the most versatile class of materials known to man.

### **Fundamentals of Semiconductor Fabrication - May & Sze**

This concise introduction to semiconductor fabrication technology covers everything professionals need to know, from crystal growth to integrated devices and circuits. Throughout, the authors address both theory and the practical aspects of each major fabrication step, including crystal growth, silicon oxidation, photolithography, etching ...
