The "review" is the book by Charles Petzold entitled The Annotated Turing: A Guided Tour through Alan Turing's Historic Paper on Computability and the Turing Machine. I believe that Turing, with his use of diagonalization, might have liked the notion that this is a review of a review but that is just speculation.

The Annotated Turing is an important addition to any Computer Science curriculum. It can be used in the study of the Theory of Computation, History of Computing, Computability, Theoretical Computer Science, and mathematical topics relevant to computer science.

The Annotated Turing by Charles Petzold

About the Book. The Turing Machine is an imaginary "not even quite hypothetical" computer invented in 1936 by English mathematician Alan Turing (1912-1954) to help solve a question in mathematical logic. As a byproduct, Turing also founded the field of computability theory "the study of the abilities and

limitations of digital computers.
