In physics, string theory is a theoretical framework in which the point-like particles of particle physics are replaced by one-dimensional objects called strings. It describes how these strings propagate through space and interact with each other. On distance scales larger than the string scale, a string looks just like an ordinary particle, with its mass, charge, and other properties ...

2. Fabrication of microneedles. Individual small needles have been hand-crafted for research purposes for decades and already in the 1970's low-cost microneedle arrays were envisioned for drug delivery . However, it was not until the 1990's that the microelectronics industry provided the microfabrication tools needed to make microneedles suitable for pharmaceutical applications .
